COMING SOON! Testo Digital HVAC Compact Class Instruments  
Become an EV Chargers Value Added Partner

### SPOTLIGHT ON: COMING SOON! Testo Digital HVAC Compact Class Instruments

**Our new Testo instruments give you precise readings-easily and quickly as you need reliable measurement results immediately to move fast in your job.**

The new range of Testo digital HVAC offers 11 measuring instruments, 9 measurement parameters and 1 App to help you get the right reading that you need to know to make the right decisions in all important applications.

**Air Conditioning:** You can easily control Air conditioning and ventilation systems with testo new flow velocity measuring instruments and ensure that sufficient fresh air is supplied to the rooms and stale air is discharged.

You can perform these tasks quickly, easily, precisely and with smart App support: In the duct, at the outlet and when adjusting the balanced residential ventilation.

**Comfort:** With new Testo compact measuring instruments you can view CO2, illuminance, temperature, indoor air quality or humidity quickly, easily and precisely to ensure comfort and a healthy climate indoors.

**Pressure:** With the differential pressure measuring instrument testo 512, you can check the gas pressure on burners quickly and precisely by measuring gas flow pressure and static gas pressure - indispensable for maintenance work on heating systems. testo 512 is also your reliable partner for general pressure measurement, checking filters and Pitot tube measurement.

**Temperature:** Digital differential temperature measuring instrument testo 922 gives easy, fast and precise differential temperature measurement with dual thermocouple Type K probe (2 TC Type K probes included). It has a wide range of applications due to large measuring range from -50 °C to 1000 °C
