SPOTLIGHT ON:

Eurotec Thermography Certification Courses August 2022

After successful courses in May, our next thermography certification courses in August are already filling up. The Auckland course is full, but we have seats remaining in our Christchurch and New Plymouth courses.

Since 2014, Eurotec have been offering thermography certification workshops through which a Category 1 thermography certification can be attained. The course teaches you how to make use of all camera features and functions and increases your knowledge to be able to further meet challenges of thermography.

How is the course run?

The course tutor, Jeff Erichsen of Advanced Infrared Resources Australia, will conduct the course via Microsoft teams, with Eurotec qualified thermographers managing the class and assisting with practical lessons.

Do I need to have a specific brand of camera?

No matter what brand of camera you have, this course will teach you how to use your thermal imaging camera to its full potential and give you the tools to become a Category 1 Qualified Thermographer. If you don't have a camera yet, we can provide cameras for the duration of the course.

What do I need to bring?

Attendees are required to bring a laptop and headphones for use during the course.

See what past students have to say about the course.

“Great course. If you need to learn anything/everything concerning thermography - attend the course!”
Deon Steenkamp, McKay Ltd

“If you are thinking of thermography, this is the course for you. Amazing course material and tutor competency. Awesome value for the price of the course. You will leave this course with a great level of knowledge, confidence and competence.”
Neeraj Deshpande, Heat Insight.

“The amount of knowledge and understanding I have gained from this course is priceless”
Ryan Ridderhof, Mickor Electrical

Secure your spot today by filling out the registration form below and sending it back to us. We look forward to seeing you in August!

NEW! Testo Digital Refrigerant Scale

Be sure. **testo**

The new Testo 560i Digital Refrigerant Scale with Intelligent Valve, revolutionizes the charging of refrigeration systems and heat pumps.

The 560i includes automatic charging according to the target value – thanks to patented technology. Simply select the charging program in the Testo Smart Digital Manifold or Testo Smart App, enter the target value and the Digital Refrigerant Scale + Intelligent Valve do the rest for you.

Best of all, the Testo 560i is fully compatible with existing Testo digital manifolds (550s, 557s & 550i) and their predecessors (550 & 557), as well as the Testo 115i, 549i, and 605i Smart Probes.

Key features and benefits

- Automatic refrigerant charging including over-charge protection.
- Remote operation of scale through digital manifold or Smart App.
- Scale sends and receives live data directly to/from your device.
- Compatible with Smart Probes for live target superheat charging.
- Bluetooth® 5.0 with 50m+ range.
- Compatible with Testo digital manifolds 557s, 550s, 550i and predecessor models Testo 550/557.
- IP Class IP44 Scale, IP54 Valve - operate in every weather condition
- Flat edges – allows to place up to 100kg refrigerant bottles.
