## Refrigeration Business Unit Newsletter

Issue 29

February 2023

**Inside this issue:**  
Celebrating Carels' 50 Years of Achievements  
Carel recognised as one of Italy's most  
climate-friendly companies  
Testo Smart Probes

### SPOTLIGHT ON:

**50 years of control solutions and humidification systems  
for HVAC/Refrigeration**

**CAREL**

Since 1973, Carel's products have been created with the awareness that sustainability encompasses the entire process of design, manufacture and marketing. Over time, technologies, needs and sensitivities have evolved, as have the objectives and the means to achieve them.

Today, even more than in the past, the strategy that guides innovation within the Group has sustainable success as its guiding factor. Discover Carel's history and the path that it intends to follow in order to achieve, day after day, concrete and measurable objectives, for the present and future generations.

### **CAREL on the podium of most climate-friendly companies**

CAREL has been recognised as one of Italy's most climate-friendly companies, according to the 2023 ranking compiled up by Corriere della Sera, Pianeta 2030 and Statista.

CAREL is ranked 29th in the general classification, but second amongst the companies dealing with industrial products and components.

The ranking was compiled considering the rate of reduction in the intensity of emissions between 2019 and 2021 of 550 companies operating in the country, selected based on revenues or listing on the Italian stock exchange.

CO2 emissions were assessed by considering both direct emissions, such as the use of fossil fuels for heating, the vehicle fleet and refrigerant gases, and indirect emissions, resulting from the generation of electricity, heating, cooling and steam consumption.

Francesco Nalini, CAREL's CEO, commented: "Sustainability goals are an integral part of our industrial plan. Sustainable business and growth are for us the only option. Some of the actions we have adopted undoubtedly have short-term costs, while the benefits will be seen in the long term, including being judged positively by customers and the financial markets".

# Smart Probes

## Pro measurement Technology

Compact and professional HVAC&R measuring instruments optimized for smartphones. Measure quickly and reliably without cables!

### Smart Probes Smart on the Job

- **Practical to use**-- Easy to use, especially handy and compact, in practical Smart Case.
- **Easy Measurement**-- No measurement errors and faster results thanks to guided measurements and automatic evaluations.
- **Maximum Flexibility**-- Complete measurement jobs even at a distance of up to 100 m from the measurement site.
- **Professional Documentation**-- Convenient measurement and customer data management including dispatch by e-mail.
- **Professional Smart App**-- Multifunctional, free, compatible with Android and iOS.

**Flexible**  
Temperature measurement

**Functional Testing**  
on air conditioning plants

testo 915i

**Tightness test**  
on refrigeration plants

**Refrigeration and heating performance**  
of air conditioning plants
